Hello dear Serious Sam fans!

For the past 15 years we at Croteam dedicated to making of Serious Sam game series. Serious Sam is our baby, we put so much sweat and effort into making it and it grew far beyond any of our initial expectations. Serious Sam games won numerous awards, but more importantly they won hearts of many gamers around the world.

Now, we are proud to announce you our new baby, The Talos Principle, first person philosophical puzzler game.

But every new start is hard. Putting a new title on the gaming map is very delicate and challenging task. We need to grow community and awareness for The Talos Principle. This is where you can jump in and help us.

Join our official The Talos Principle Steam group and invite your friends into it. In return we prepared hundreds of Steam game keys for various top notch games for our members.

Hey! We are working so hard on Serious Sam 4, that we almost forgot it's been 15 years since we first launched Serious Sam: The First Encounter! Can you believe it? Neither can we, but we are still here, Sam is still here, and most importantly, you are still here. So let's celebrate this together: in light of this anniversary which is taking place today, on 21st of March, we prepared trading cards for both Serious Sam HD First and Second Encounter. Now all you boys and girls can go back playing these classic games and get your shiny cards, you know you deserve them!

Btw, how do you like them?

. Demo recording update released.:

A new update has just gone live, adding the new demo recording feature, enabling OpenAL and DirectSound sound APIs, and several fixes and smaller tunings. Check [the complete list](#). **Featured Mod – Red Day: Episode One:**

Hey everyone! Check out this epic Serious Sam Fusion mod – **Red Day: Episode One**. It's a custom campaign mod telling a story about Sam's war against the Mental forces in Russia.

The highlight of this Serious Sam Fusion mod is a three-part, 50-minute long campaign set in a typical Russian provincial city Muhogradsk. The Red Day campaign is full of chaos and crazy arena-style action spanning over three custom levels, with cutscenes and everything you'd expect from a full-blown campaign. Oh, and there's a brand new soundtrack, as well so make sure you check it out on Steam and let us know what you think.

Massive thanks to the powerful **Dead_Kadath** for making this mod happen.

NOTE: To play the mod you'll need to own SSHD: The First Encounter, SSHD: The Second Encounter, Legend of the Beast, SS3: BFE and SS3: BFE Jewel of the Nile.

Our community has always been big on modifying Serious Sam and The Talos Principle to their liking, so we thought it's long overdue giving them mad props for all the creative work they do. This is why we have decided to periodically feature some of those mods on our channels and get more people in on the action.

Are you making Serious Sam or The Talos Principle mods yourself? Let us know, we'd love to check them out.

Hey everyone! It's that time of the year again, the time of Fusion updates. This time, we're bringing to you a relatively small update focusing mostly on bug fixes and tweaks, rather than new features, engines and other huge changes that were introduced several months ago.

Guided by our community we have made huge progress in providing you with a stable, up-to-date Serious Sam experience, and Fusion is at its peak right now. It's THE way to play all supported Serious Sam games.

The changelog is below:

- fixed an issue where the player would stop moving after using the weapon wheel
- added various missing translations
- fixed some navigation issues in Karnak (TFE)
- fixed an issue where the menu palette would not change in some cases after leaving multiplayer games
- fixed an issue with the weapon wheel becoming unusable after finishing a level
- fixed an issue with the text overlapping on certain screens
- VR FPS counters will no longer be shown in non-VR games
- fixed an issue with client aiming being off in 3rd person in multiplayer
- newer Nvidia Quadro GPU's should no longer be marked as not compatible by mistake
- rebaked visibility on all SSHD and Sam 3 levels
- fixed an issue where the serious bomb would not disappear from the inventory upon finishing the level

-
- fixed an issue where killing certain enemies would cause crashes in rare instances
 - the game no longer has issues starting-up on lower end dual-core CPU systems
 - the weapon wheel should now work when using custom button layouts on a gamepad
 - various other tweaks and performance/stability fixes

As ever, in case you are having issues with this update, you can roll back to the previous one:

- locate the game in the Steam's "Library" panel
- right click and invoke "Properties"
- select the "Betas" tab
- choose "previousversion"

Note – After downloading this patch, it is most likely that many custom maps will crash when played. The authors of these maps can fix this by rebaking the visibility on their maps and updating their workshop items. We apologize for the inconvenience.
